## BASIC-ABSTRACT:

Liquid fabric softening composition comprises at least 1 fabric softener material and a mixture of at least 2 cationic dye fixing agents, preferably at least 1 water soluble and at least 1 water insoluble dye fixing agent.

The fabric softener is preferably a cationic fabric softener comprising quaternary ammonium compounds and amine precursors of formula ((+)N(R1)(R2)(R3)(CH2)n-Q-T1)(X-) (I) or (+)N(R3)3-(CH2)n-CH(QT1)CH2QT2(- X-) (II). Q = O-C(O), C(O)-O, O-C(O)-O, NR4-C(O) or C(O)-NR4; R1 = (CH2)n-Q-T2 or T3; R2 = (CH2)m-Q-T4, T5 or R3; R3, R4 = 1-4C alkyl, 1-4C hydroxyalkyl or H; T1-T5 = 11-22C alkyl or alkenyl; n, m = 1-4 and X- = softener-compatible anion. The composition comprises 0.1-10 (preferably 0.5-8, especially 1-5) wt.% of the mixture of dye fixing agents and the ratio of water-soluble dye fixing agent to water-insoluble dye fixing agent is 0.01:1-2:1, preferably 0.1:1-1:1, especially 0.3:1-0.8:1.

ADVANTAGE - The composition reduces the amount of dyes released from coloured
